

Form 4: New Work Item Proposal

Circulation date: 2019-07-29	Reference number: (to be given by Central Secretariat) ISO/TC 154
Closing date for voting: 2019-09-30	
Proposer (e.g. ISO member body or A liaison organization) OASIS	N 1069
Secretariat SAC	

A proposal for a new work item within the scope of an existing committee shall be submitted to the secretariat of that committee with a copy to the Central Secretariat and, in the case of a subcommittee, a copy to the secretariat of the parent technical committee. Proposals not within the scope of an existing committee shall be submitted to the secretariat of the ISO Technical Management Board.

The proposer of a new work item may be a member body of ISO, the secretariat itself, another technical committee or subcommittee, an organization in liaison, the Technical Management Board or one of the advisory groups, or the Secretary-General.

The proposal will be circulated to the P-members of the technical committee or subcommittee for voting, and to the O-members for information.

- The proposer has considered the guidance given in the Annex C during the preparation of the NWIP.

Proposal (to be completed by the proposer)

Title of the proposed deliverable.**English title:**

Electronic business eXtensible Markup Language (ebXML) -- Part 2: Applicability Statement (AS) profile of ebXML messaging service

French title:

Titre manque -- Partie 2: Titre manque

(In the case of an amendment, revision or a new part of an existing document, show the reference number and current title)

Scope of the proposed deliverable.

This document describes the ISO/IEC 15000 AS4 Profile, which is Part 2 of the ISO/IEC 15000 series of International Standards. The AS4 Profile provides a subset of the functionality ISO/15000 ebXML Messaging Services Version 3.0 Core Specification, which is Part 1 of the ISO/IEC 15000:2019 series, along with implementation guidelines based on the “just-enough” design principles and electronic data interchange functional requirements to trim down ebMS 3.0 into a more simplified specification for Web Services business-to-business messaging.

It specifies:

-Three Conformance Profiles of the ISO/15000 ebXML Messaging Services Version 3.0 Core Specification (see section 4)

-A number of AS4 Additional Features (see section 5).

-Complementary Requirements for the AS4 Multi-Hop Profile (see section 6).

-AS4 Usage Profile of ebXML Messaging Services Version 3.0 Core Specification (see section 7)

This International Standard is applicable to all types of organizations (e.g., commercial enterprises, government agencies, not-for-profit organizations) that exchange documents or data electronically using messaging.

Purpose and justification of the proposal*

The ISO 15000 series was established in 2004 as a multi-part technical specification for electronic business. The inputs to ISO 15000 were specifications developed within OASIS and UN/CEFACT. Over the years, these specifications have been adopted globally in a wide variety of domains, both in the private and public sector. The submission to ISO was made in response to requests from end users of these specifications for whom ISO recognition was important.

Within OASIS, two successor specifications have been developed to the original ISO 15000-2 part, ebXML Messaging Services version 2.0. These are ebXML Messaging Services version 3.0, Core Specification and the AS4 profile of ebMS 3.0. These specifications solve the problem of securely and reliably exchanging business documents and data electronically in an interoperable way. The ebMS 3.0 and AS4 specifications are increasingly being adopted by end users, sometimes as more modern replacement for the earlier ebMS 2.0 specification, but also for new application domains. End users of ebMS 3.0 and AS4 include governmental organizations that are using the specifications for national or cross-border data exchange. Some express a desire to be able to make legal reference to them as ISO specifications. For this reason, OASIS is submitting these newer specifications for inclusion in the ISO 15000 series.

Consider the following: Is there a verified market need for the proposal? What problem does this standard solve? What value will the document bring to end-users? See Annex C of the ISO/IEC Directives part 1 for more information. See the following guidance on justification statements on ISO Connect:
